

Tactical Patterns

- Building Blocks

- **Layered Architecture**
- **Aggregates**
- Value Objects
- Entities
- Factories
- Repositories
- Services
- Domain Events

Layered Architecture

| Name | Description | Example |
|----------------|--|---------------------------|
| UI | User Interface or API | Web form Json API |
| Application | Thin. No Biz Rules. Stateless. Use Cases. Coordinator. | Funds Transfer Service |
| Domain | Business Concepts, Biz Rules. The heart of the business software. | DDD |
| Infrastructure | Support for the other layers | Pub-Sub DB |
